I have been teaching myself programming for a year, and will soon graduate from UC Berkeley's Web Development Bootcamp. I enjoy solving problems, learning new skills, and building interesting things. I am curious, tenacious, and meticulous.

Projects

weatherDashboard

jQuery, moment.js, OpenWeather API, HTML/CSS

I created a weather dashboard that fetches real time data from the Openweather API, giving current conditions, and a 5 day forecast, all dynamically populated to the page.

JSeopardy

jQuery, HTML/CSS

I created a Quiz Game to test your coding knowledge. Scores are saved to a scoreboard, which is kept in local storage.

Password Generator

JavaScript, HTML/CSS

I created a password generator that prompts the user for different data types, and then generates a secure, random password, meeting the desired criteria.

Education

UC Berkeley Extension

Berkeley, CA — *Full Stack Web Development Bootcamp*

University of Michigan

Ann Arbor, MI — *Choral Music Education*

Programming Skills

Languages

Ruby, Javascript, Lua, Python

Development

HTML/CSS/jQuery, MERN Stack

Version Control

Git

Familiar With

Web API, Vimscript, Bootstrap

Other Skills

Social

Team leadership, RJ circle facilitation, Mindfulness meditation facilitation, Conflict resolution

Misc.

Singing, Piano, Reading/writing musical notation, live sound, emceeing, bike maintenance, chess, climbing, roller skating

Languages

English, Tagalog
